## EDUCATION

### MSc. Data Science

Universität Trier

10/2022 - Present

### BE Software Engineering

Mehran University of Engineering and Technology

10/2017 - 10/2021

## WORK EXPERIENCE

### Mobile Application Developer

30i, LLC

04/2021 - 01/2022

Wisconsin, USA

*Achievements/Tasks*

- Led development and launch of 'Mavin': a mobile app mirroring Tinder's interface, connecting users with nearby mental health professionals for easy appointment booking, fostering accessibility and support for mental well-being on both Android and iOS platforms.

## TECHNICAL SKILLS

Python

SQL

pandas

sklearn

Tensorflow

Java

Flutter

Java

Android

## PERSONAL PROJECTS

Passive authentication for android devices using mobile sensor data (01/2021 - 10/2021)

- In my bachelor thesis, I developed a machine learning model for passive user authentication, leveraging sensor data to classify physical activities. By analyzing a comprehensive dataset of device sensor measurements, I successfully engineered a system that achieved an accuracy rate exceeding 90%, demonstrating proficiency in data-driven authentication techniques.
